

(EARTH) in its entity  
can be felt  
from HEART to HEART

Why industrialism and Capitalism  
material wealth and money  
can not make us feel happy  
— an insight that enables change —

as human beings we yearn for positive emotions  
from the moment we are born

esp. as a baby

we depend on another being, a 'YOU',

we need someone

to care for us

to give us food, warmth, body contact

to love us

that makes us content, satisfied, feeling well —  
no pain, no uncertainty, no threats

as an adult in our society

we try to get this feeling by earning money:

the whole day is spent doing a job in order to  
earn money so we can buy things and services  
which shall make us feel ~~st~~ satisfied, content,  
safe ... loved

# but that doesn't work !

because money is money  
and not a 'YOU' who ~~app~~ appreciates that we  
are here,  
who appreciates us;

when we do something      [a flower we've planted  
or                                   grows and blossoms]

when we as a person

just because we are who we are

effect a positive emotion in another being

[a dog wags its tail, a person 'lights up' = smiles when  
they see us] :

this transformation

this change,

- when you've once experienced it, when you once  
have witnessed it you'll know what I mean,

it changes something within your SELF, your SOUL,  
it makes you truly content and happy

e.g. when you help someone, you give away something  
and see the person who needed it feel relieved that  
they got it;

when you feel the smile that spreads over your mom's  
face when you come home for a visit;

when you sing together with others;

cook for someone who's hungry;

when you help someone who's sick

inside the other being arises a

heartfelt 'THANK YOU'

heartfelt relief

heartfelt joy

heartfelt Love and you can feel it,

you can feel it inside your heart, your SELF, your SOUL

so there forms a bond

a connection

from HEART to HEART

and in this moment

time ceases to exist

EARTH is felt in its entity

~~as~~ undamaged, unhurt,  
whole

and this is what makes us truly happy,  
truly content and peaceful, quiet, satisfied

for one being to be able to feel like that  
someone else, another being, another creature  
needs to feel these emotions, needs to emanate  
the vibrations of those positive feelings,  
to radiate the light, the energy

which are caused

by something we've done

caused by who and how we are

caused, because we've been who and what and how  
we wanted to be:

patient, friendly, gentle

caused by our good intentions, by our art, our words, our time, space, will, action, thoughts, deeds for the other being

**caused by our godly creation of love, of goodness - our love**

this makes us happy

**and no money can buy it**

on the contrary

money is useless when we want to be truly content

worse

money harms

money destroys

money enslaves and hinders heartfelt freedom

---

I've chosen the positive actions, thoughts, words  
I like to shine, to radiate light and gentleness,  
I like to spread harmony and warmth, to share my  
joy over a flower, over the smell of lavender,  
the shape of a rock, the wonders of nature,  
I love it  
and I love it when others 'catch it', when people  
transform, live up, feel better because of me  
and when EARTH feels better because of me  
because I don't injure her but give back to her  
as good as I can

LOVE shines

and becomes really true  
When I start the things

I need to do

Considering I am part of YOU

once this happens

broken SELVES will heal

and grow whole

almost empty glasses

start to look full

I'll care for YOU

and

YOU'll care for me

the moment

breathes

eternity

LOVE shines .

? and how's there any difference between  
LOVE and GOD ?

? who's YOU ? you and EARTH !

? which things do I need to start doing ? healing EARTH,

? eternity ? no time, only Now healing YOU

eternal ? isn't that what GOD is ? ! LOVE to YOU ALL !  
good rune
